

Muhammad Hibatullah Wafi

IT Support Specialist · Helpdesk Engineer · Technical Support

Bekasi, Indonesia · +62 813-1018-1027 · mhibatullahwafi@gmail.com · linkedin.com/in/mhwafi · github.com/mhibx

PROFESSIONAL SUMMARY

IT Support and Helpdesk professional with 5+ years of hands-on experience in system administration, CRM platform management, end-user technical support, and workflow troubleshooting across high-volume digital and marketplace environments. Holds CompTIA Security+, ISC2 Certified in Cybersecurity (CC), and eJPT certifications. Proven ability to diagnose and resolve hardware, software, and platform issues, manage user access and permissions, document resolution procedures, and communicate technical concepts clearly to non-technical users. Actively building cybersecurity home lab (Wazuh SIEM) to support long-term growth into security operations.

TECHNICAL SKILLS

IT Support & Helpdesk: System troubleshooting, user access management, password resets, CRM configuration, software installation, remote desktop support, Windows 10/11, basic networking (TCP/IP, DNS, DHCP, connectivity)

Tools & Platforms: CRM Systems (admin & configuration), Microsoft Office Suite, Google Workspace, Google Analytics, email/marketing platforms, payment gateway integration

Security (Supporting): Wazuh SIEM, Wireshark, Nmap, Burp Suite, Kali Linux, Windows Event Logs, OWASP Top 10, vulnerability assessment basics

Operating Systems: Windows 10/11 (daily), Kali Linux (security labs), Ubuntu Server (home lab admin)

Soft Skills: Documentation, incident escalation, user communication, SLA awareness, process improvement, analytical thinking

LICENSES & CERTIFICATIONS

- **CompTIA Security+** · CompTIA · Jul 2026 · Jul 2026 – Jul 2029
- **Certified in Cybersecurity (CC)** · ISC2 · Apr 2026 – Apr 2029
- **Junior Penetration Tester (eJPT)** · INE Security · Feb 2026 – Feb 2029
- **Certificate of Excellence — Cyber Security Engineer Bootcamp** · Merdeka Siber Academy · 2025
- **Mastered Predicate — Web Penetration Testing Bootcamp** · Codelamp Indonesia · 2025

HANDS-ON PROJECTS & LABS

Wazuh SIEM Home Lab

- Deployed Wazuh SIEM on Ubuntu Server with Windows endpoint agent — configured log collection, alert rules, and dashboard monitoring
- Built detection cases: Failed Login (Event ID 4625), Brute Force SSH, PowerShell monitoring — documented investigation steps and mapped to MITRE ATT&CK
- Wrote structured Incident Investigation Reports per case, mirroring SOC L1 workflow

OtoSINT — Automated OSINT Toolkit

- Developed a Bash-based OSINT automation tool for subdomain enumeration, WHOIS lookup, DNS recon, HTTP probing, and asset discovery

Web Application Security Testing

- Conducted manual OWASP Top 10 testing (SQLi, XSS, IDOR, broken authentication) using Burp Suite on intentionally vulnerable targets
- Produced structured VAPT reports: Merdeka Bank Pentest, Jersey Sekat Pentest — documented findings, risk ratings, and remediation steps

PROFESSIONAL EXPERIENCE

CRM & Marketing Specialist — VCGamers Indonesia

2023 – 2024

- Administered CRM platform — configuring workflows, user roles, data structures, and access permissions (equivalent to IT system administration)
- Provided Tier-1 technical support to 500+ internal users; resolved CRM and system-related issues with minimal escalation and documented resolution steps
- Analyzed system logs and user behavior data to proactively identify platform issues and improve operational performance
- Collaborated with product and engineering teams to troubleshoot and optimize system usage across departments

Business Development Associate — VCGamers Indonesia

2022 – 2023

- Identified and resolved operational and platform-related issues through systematic analysis of user-reported incidents
- Documented workflow improvements and communicated findings to technical and non-technical stakeholders
- Supported system configuration and optimization based on user feedback and performance data

Merchant Acquisition Lead — VCGamers Indonesia

2021 – 2022

- Onboarded 100+ merchants with hands-on system usage training and technical guidance
- Troubleshoot and resolved merchant-reported platform issues independently, escalating complex cases to engineering
- Analyzed product and performance data to identify usability issues and recommend platform improvements

Internet Analyst — Lionbridge Technologies Inc.

2019 – 2021

- Evaluated website quality, UX, and technical accuracy across global search platforms — developing strong analytical and documentation skills
- Identified technical inconsistencies and reported structured findings to improve platform quality

Founder & Principal — Insider Top Up (Self-employed)

2023 – 2026

- Managed full-stack operations: website administration, payment gateway integration, CRM, analytics, customer support, and process automation
- Handled 2000+ monthly transactions with independent troubleshooting, issue resolution, and customer communication
- Built and maintained internal processes and documentation for business continuity

EDUCATION

Faculty of Economics and Business — Accounting Major

2026 – Present

Universitas Terbuka · Current GPA: 3.03
