

Muhammad Hibatullah Wafi

Junior SOC Analyst · Security Analyst · Blue Team

Bekasi, Indonesia · +62 813-1018-1027 · mhibatullahwafi@gmail.com · linkedin.com/in/mhwafi · github.com/mhibx

PROFESSIONAL SUMMARY

Cybersecurity professional targeting Junior SOC Analyst roles with hands-on experience in SIEM deployment, log analysis, threat detection, and incident investigation. Holds CompTIA Security+, ISC2 CC, and eJPT — and maintains an active home lab running Wazuh SIEM with documented detection use cases mapped to MITRE ATT&CK. Background in CRM administration and technical user support (5+ years) provides strong analytical thinking, documentation habits, and cross-functional communication skills directly applicable to SOC operations. Currently deepening expertise in Windows Event Log analysis, Sigma rules, threat hunting, and Microsoft Sentinel.

TECHNICAL SKILLS

SIEM & Log Analysis: Wazuh (deployed & configured), Windows Event Logs (Event IDs 4625, 4688, 4697, 4720), log ingestion, alert rule creation, dashboard monitoring

Threat Detection: Brute force detection, failed login monitoring, PowerShell abuse detection, MITRE ATT&CK mapping (Tactic/Technique level), basic IOC identification

Security Tools: Wireshark, Nmap, Burp Suite, Metasploit, Gobuster, Nikto, Kali Linux, VirtualBox, Docker

Offensive/VAPT: Web application pentesting (OWASP Top 10: SQLi, XSS, IDOR, Broken Auth), Burp Suite, manual testing methodology, structured VAPT report writing

OSINT & Recon: OtoSINT (self-developed), subdomain enumeration, WHOIS, DNS recon, crt.sh, HTTP probing, technology fingerprinting

Networking: TCP/IP, DNS, HTTP/HTTPS, SSH, basic firewall concepts, network traffic analysis

OS & Dev: Windows 10/11, Ubuntu Linux, Kali Linux, Bash scripting (automation), Git/GitHub

Frameworks: MITRE ATT&CK, OWASP Top 10, basic Incident Response lifecycle

LICENSES & CERTIFICATIONS

- **CompTIA Security+** · CompTIA · Jul 2026 · Jul 2026 – Jul 2029
- **Certified in Cybersecurity (CC)** · ISC2 · Apr 2026 – Apr 2029
- **Junior Penetration Tester (eJPT)** · INE Security · Feb 2026 – Feb 2029
- **Certificate of Excellence — Cyber Security Engineer Bootcamp** · Merdeka Siber Academy · 2025
- **Mastered Predicate — Web Penetration Testing Bootcamp** · Codelamp Indonesia · 2025

CYBERSECURITY PROJECTS & LABS

Wazuh SIEM Home Lab — Detection Engineering & Investigation

- Deployed Wazuh SIEM on Ubuntu Server; onboarded Windows 10 endpoint via agent — configured log sources, custom rules, and alerting pipeline
- Built and documented 4 detection use cases: Failed Login (Event ID 4625), Brute Force SSH, PowerShell Execution Monitoring, Windows Event Investigation
- Mapped each detection to MITRE ATT&CK (e.g., T1110 Brute Force, T1059.001 PowerShell) and wrote structured Incident Investigation Reports per case
- Created investigation documentation simulating SOC L1 triage workflow: alert → log review → timeline → severity → recommended action

OtoSINT — Automated Reconnaissance Toolkit

- Built Bash automation tool for OSINT recon: subdomain enumeration, WHOIS, DNS, crt.sh integration, HTTP probing, and technology fingerprinting
- Designed to streamline the information gathering phase of security assessments — currently available on GitHub

Web Application Penetration Testing

- Conducted structured OWASP Top 10 testing on Merdeka Bank (simulated) and Jersey Sekat targets using Burp Suite — identified SQLi, XSS, IDOR, and broken authentication vulnerabilities
- Produced professional VAPT reports with findings, CVSS risk ratings, reproduction steps, and remediation recommendations

Password Security Research

- Built a suite of password security tools: Weak Password Checker, Strength Checker, Hashing Demo (MD5/SHA/bcrypt comparison), Salted Hashing — demonstrating cryptographic concepts in practice

GitHub Portfolio: github.com/mhibx

PROFESSIONAL EXPERIENCE

CRM & Marketing Specialist — VCGamers Indonesia

2023 – 2024

- Administered CRM platform — configuring workflows, user roles, data structures, and access permissions (equivalent to IT system administration)
- Provided Tier-1 technical support to 500+ internal users; resolved CRM and system-related issues with minimal escalation and documented resolution steps
- Analyzed system logs and user behavior data to proactively identify platform issues and improve operational performance
- Collaborated with product and engineering teams to troubleshoot and optimize system usage across departments

Business Development Associate — VCGamers Indonesia

2022 – 2023

- Identified and resolved operational and platform-related issues through systematic analysis of user-reported incidents
- Documented workflow improvements and communicated findings to technical and non-technical stakeholders
- Supported system configuration and optimization based on user feedback and performance data

Merchant Acquisition Lead — VCGamers Indonesia

2021 – 2022

- Onboarded 100+ merchants with hands-on system usage training and technical guidance
- Troubleshoot and resolved merchant-reported platform issues independently, escalating complex cases to engineering
- Analyzed product and performance data to identify usability issues and recommend platform improvements

Internet Analyst — Lionbridge Technologies Inc.

2019 – 2021

- Evaluated website quality, UX, and technical accuracy across global search platforms — developing strong analytical and documentation skills
- Identified technical inconsistencies and reported structured findings to improve platform quality

Founder & Principal — Insider Top Up (Self-employed)

2023 – 2026

- Managed full-stack operations: website administration, payment gateway integration, CRM, analytics, customer support, and process automation
- Handled 2000+ monthly transactions with independent troubleshooting, issue resolution, and customer communication
- Built and maintained internal processes and documentation for business continuity

EDUCATION

Faculty of Economics and Business — Accounting Major
Universitas Terbuka · Current GPA: 3.03

2026 – Present

ADDITIONAL INFORMATION

Languages: English (Professional), Indonesian (Native)

Currently Learning: Detection Engineering · Threat Hunting · Windows Event Analysis · Sigma Rules · Microsoft Sentinel · Python for Security Automation · GRC Fundamentals

Long-term Targets: SOC Analyst L2 → Detection Engineer → GRC Consultant / DevSecOps Engineer
